## **COMPU-GARD SPECIFICATIONS**

### **MODEL SC-603 UNIVERSAL SECURITY CABLE KIT**

The Compu-Gard security cable is fabricated of 1/4" thick galvanized steel aircraft cable, 7" by 19" strand, vinyl coated to 5/16" diameter and is available in 6, 8, 10 and 15-ft. lengths. Each cable package is equipped with a locking washer, large padlock, two keys and all fastening hardware necessary (listed below) to secure any type of computer, printer, monitor or office equipment to any type of furniture. Each security cable has a minimum breaking strength of 7,000 pounds. The Compu-Gard security cable provides the highest level of functionality because of its end-to-end design.

### **ACCESSORIES**

#### **Hex Nut Adapter Feet**

Steel hex nut fastener riveted to adapter foot with 3/16" diameter stainless steel rivet. Adapter foot consists of 1/8" thick cold rolled steel washer (1 3/4" in diameter) molded into 1/4" thick x 2" diameter 60 durometer rubber. Industrial super glue must be used to adhere hex nut adapter foot to equipment. Provided with cable kits.

#### **Hex Nut Fasteners**

Hex nut 5/8" wide x 3/4" long with 3/16" diameter hole for fastener in one end; 3/8" diameter access hole in opposite end; and 1/2" diameter hole through sides of nut for cable to pass through. In most cases, hex nut fasteners will protect internal components.

#### **Padlocks**

Masterlock #3 or equal. Keyed alike or keyed in groups as per school requirements.

#### **Mouse/Keyboard Security Clip (Optional)**

Prefabricated U-shaped steel security clip sized to hold mouse and keyboard cables and prevent power plugs from sliding through.
